Description:

Why is this contract needed?

The Office of Facilities Management and Services has the need for a contract to repair, service, and replace HVAC under 50-ton equipment on an as-needed basis

at all District facilities. Services include troubleshooting, repairs, and parts replacement.

How will the success of this contract be measured?

Maintenance supervisors will monitor services requested so that all repairs and services performed meet bid specifications in alignment with the HVAC equipment manufacturers' guidelines.

If this is the continuation of a contract, how has success been measured in the past, and what specific information do we have to show that it was successful?

Work order requests for HVAC under 50-ton repairs are submitted via our computerized maintenance management system. We are able to measure the success of this contract by the satisfactory completion of the requested repairs which leaves us with fully functioning HVAC equipment systems.
